

Brian Bieber, MS MPH

1250 Gene Dr, Chelsea, MI 48118 | (734) 649-6848 | bieberb1@gmail.com | [linkedin.com/in/brian-bieber-4174491b1](https://www.linkedin.com/in/brian-bieber-4174491b1)

Research scientist and epidemiologist with 18+ years of experience generating real-world evidence (RWE) from large-scale observational cohort studies and administrative claims data. Expertise in longitudinal study design, causal inference, and statistical analysis across national and international datasets including CMS claims, EHR, and registry data. Proven record of translating complex RWE analyses into peer-reviewed publications and actionable insights for biopharma stakeholders

EXPERIENCE

Arbor Research Collaborative for Health

Research Scientist, Data Analytics | September 2024-Present

- **RWE Study Leadership:** Serve as associate investigator on 3 national/international cohort studies ([PDOPPS](#), [LURN](#), NHSN/EHR) - leading statistical analysis design, report and manuscript development, and cross-site data coordination
- **RWE Consulting and Business Development:** Lead analytic consulting in real-world evidence (RWE) study design and execution for 15+ biotechnology companies, including retrospective claim analyses, comparative effectiveness studies, and synthetic control arms - managing the full project lifecycle from client needs identification through stakeholder presentation driving \$750K of yearly business development
- **Analytic Strategy and Innovation:** Lead organizational analytic strategy, including tool evaluation, developing AI/LLM adoption policy development, and rollout of Claude Code and GitHub CoPilot across the analyst team

Managing Senior Analyst | July 2012-September 2024

- **Analyst team management** – Managed team of 6-8 PhD and master's level analysts, optimizing daily and long-term workload, mentoring, facilitating professional development, promoting mission adherence, and ensuring fulfilling work environment and optimal retention/promotion
- **Publication management** of 100+ manuscripts and 150+ abstracts from real-world observational and claims-linked data – Identified research questions, coordinated detailed analytic plan construction, timeline adherence, analytic progress and integrity, drafting, coauthor review, and targeted research dissemination
- **Collaboration with stakeholders** (researchers, clinicians, nurses, patients) from 20+ countries – reviewed proposals, coordinated timelines, proposed and mutually agreed upon analytic approaches, crafted accurate, compelling, and clear description of research
- **DOPPS Practice Monitor project manager** – coordinated multiple teams (analyst, programmer, data, and clinical) to provide [1500+ figures and tables](#) related to current practices in dialysis to the nephrology community
- **Data governance** for multiple studies– Designed structure and implemented quality control for standard analytic files for national and international cohort studies
- **Initiated and designed project efficiencies** – code review checklist, standard timelines, data quality control ticketing system, and EndNote implementation

Analyst | June 2008-July 2012

- Analyzed data from international dialysis study (DOPPS)-collaborated with principal investigators to formulate and refine scientific hypotheses, implement appropriate statistical strategies, present findings, and publish results
- Managed questionnaire revision process-coordinated with clinicians, epidemiologists, and programmers to update, revise, and publish surveys
- Proficient in biostatistical and causal inference methods including Cox proportional hazards models, generalized linear models (e.g. linear, logistic, and Poisson regression), propensity score methods, and instrumental variable approaches for real-world observational data

- Developed data visualization template that was adopted as standard for organization

TECHNICAL SKILLS & DATA

Skill	Description
Statistical	SAS, Python, R, SQL, Claude Code, GitHub CoPilot, Google Colab
Cloud/DevOps	AWS Certified Cloud Practitioner, GitHub
Visualization	Tableau, R Shiny, Claude Code Artifacts
Productivity	Microsoft Word, Excel, PowerPoint, OneNote, CoPilot, Teams, EndNote
Datasets	CMS claims data: USRDS (United States Renal Data System), full claims data via VRDC including ICD-10, CPT/HCPCS codes, and Part D data, Dialysis Facility Report; DOPPS cohorts: CKDopps (international chronic kidney disease study), DOPPS (international hemodialysis study), PDOPPS (international peritoneal dialysis study); LURN (Lower Urinary Tract Dysfunction Network) - including NIH data repository creation; MOQC (Michigan Oncology Quality Consortium) - analyzed/reported for CQI purposes; EHR data: NANI (Nephrology Associates of Northern Illinois and Indiana), CKDopps Germany; NHSN (National Healthcare Safety Network)

EDUCATION

- **Master of Public Health in Epidemiology** (May 2007)
University of Michigan, Ann Arbor, MI
- **Master of Science in Physiology** (May 2005) and **Bachelor of Science in Physiology** (May 2003)
Michigan State University, East Lansing, MI

RECENT PUBLICATIONS (125+ peer-reviewed publications)
